

WEEK 1 ASSIGNMENT ON COMPUTER SUPPORT & MAINTENANCE

YEAR: SEMENTER 1

NAME: LITS'OANELO LEBONA

STUDENT NO: 20250017

1. System Components (50 words)

A multimedia system includes hardware such as computers and speakers, software such as video players and operating systems and content such as videos and music. These components work together to allow users to watch, listen, and interact with media.

2. Troubleshooting Practice (100 words)

If a video is not playing, first check if the internet connection is working. Refresh the webpage or restart the media player. Check if the file format is supported. Update the media software if needed. Also check the volume and speaker connections. These steps help solve most multimedia problems.

3. Maintenance Task (100 words)

Maintenance involves keeping systems working properly. Software updates fix bugs and improve security. Antivirus scans protect against viruses. Cleaning files and checking hardware cables helps prevent errors. Regular maintenance ensures smooth performance and longer system life.

Multimedia System Support

HAND WRITTEN NOTE

NAME: LITSOANCHO LEBONA
COURSE: COMPUTER SUPPORT & MAINTENANCE
DATE: 30-01-2026
Computer support and maintenance is important for keeping keeping computer large, fast and reliable. Regular preventive maintenance avoids major problems while corrective maintenance fixes faults when they happen. Every organization must maintain its computers to ensure smooth work.
